OUR INVESTMENT PHILOSOPHY

# The Hikari Investment Standard

Hikari’s competitive edge comes from creating a luxury destination where technology, environment and hospitality feel completely considered.

## FEWER TECHNOLOGIES, HELD TO A HIGHER STANDARD

We will invest in fewer pieces of equipment and hold every purchase to the highest standard. Each machine must deliver exceptional performance while also meeting Hikari’s expectations for refined design, guest comfort and dependable support.

## SPACE TO BREATHE

Generous treatment rooms give every guest greater privacy and calm. The technology supports the experience without dominating it.

## SPECIALIST MANUFACTURERS

**USA GERMANY FRANCE ITALY THE NETHERLANDS TÜRKİYE**

## THE HIKARI STANDARD

We compete on experience, feeling and hospitality.

THE TECHNOLOGY STRATEGY

# 01. Technology Portfolio

A portfolio of clinical and recovery technologies delivered through a hospitality-led guest journey.

HIK ARI HOUSE
VITA INFUSION & RECOVERY SUITE

# RED LIGHT THERAPY

Five clinically recognised red and near-infrared wavelengths deliver comprehensive full-body photobiomodulation. Designed for recovery, skin health, performance and overall wellbeing.

01

## Five Therapeutic Wavelengths

633, 660, 810, 850 and 940 nm provide layered light exposure from the skin through deeper muscle and connective tissues.

02

## Powerful Full-Body Exposure

43,200 high-performance LEDs deliver irradiance of 99 mW/cm2 across a standard 12-minute wellness session.

03

## Smart-Glass Privacy

Changes from clear to obscured at the touch of a button, giving privacy without compromising the room's open design.

| 5 WAVELENGTHS | 43,200 LEDs | 99 mW/cm2 | 12 MINUTES |

**COMMIT GMBH** / MADE IN GERMANY

# MITOVIT

## Hypoxic training system

MITOVIT alternates reduced-oxygen intervals with normal or oxygen-enriched recovery while the guest rests in a comfortable, semi-reclined position.

### ADJUSTABLE HYPOXIC RANGE

## 9-18% $O_2$

Approximately 1,200 to 6,750 metres of simulated altitude

### INDIVIDUAL STARTING POINT

An automated test sets the starting concentration. Biofeedback then adjusts oxygen delivery throughout the session. Two pulse oximeters monitor blood oxygen and trigger normoxic air if readings diverge.

*SOURCE: MITOVIT PRODUCT BROCHURE, P.17 / EQUIPMENT SHOWN AS SUPPLIED*

### HIKARI HOUSE FIT

Quiet, semi-reclined sessions add a repeatable hypoxic training protocol to the recovery pathway.

### OPERATING ADVANTAGE

The integrated oxygen concentrator removes the need for cylinder replacement.

INDICATIVE EQUIPMENT VISUALISATION

## Custom Built

The selected chamber will be fully customised for Hikari House, with bespoke exterior and interior finishes designed to integrate seamlessly with the wider hospitality environment.

# HBOT HARDSHELL SIGNATURE

A premium single-person hard-shell HBOT chamber combining intelligent pressure technology, advanced safety systems and exceptional comfort within a refined contemporary design.

01

## Intelligent Pressure Control

Up to 2.0 ATA with three adaptive pressurisation speeds, internal and external touchscreens, and real-time status monitoring.

02

## Comfort Beyond the Standard

A soft, sofa-style recliner, integrated smart TV and whisper-quiet operation create a more relaxed experience.

03

## A Private, Personal Experience

The chamber provides a calm, considered setting with intuitive internal controls and real-time monitoring.

| 2.0 ATA | 3 PRESSURE SPEEDS | 1 SEAT | < 50 dB |

STENDO / BODY V4 / MADE IN FRANCE

# STENDO

## Compression & Lymphatic Drainage

**CARDIO-SYNCHRONISED PULSOTHERAPY®**

A comfortable, non-invasive whole-body treatment that uses intelligent compression timed to each guest's heartbeat.

**WHY IT BELONGS AT HIKARI**

## Quiet recovery, without downtime.

A calm, low-effort ritual with app-controlled programmes - easy to position within a premium recovery journey.

*MANUFACTURER IMAGE / EQUIPMENT DESIGN SHOWN AS SUPPLIED*

**WHAT MAKES IT DIFFERENT**

## The massage follows the heartbeat.

A pulse sensor coordinates gentle mechanical waves with the cardiac cycle. The patented Pulsewave® suit then delivers even, full-body compression - personalised through the STENDO app.

| COMPRESSION RANGE | TREATMENT CHOICE | CONNECTED CONTROL |
|---|---|---|
| 45-75 mmHg | 6 programmes | Bluetooth + Wi-Fi |

For wellness and recovery use only. Not intended to diagnose, treat, cure or prevent disease.

HIK ARI HOUSE

VITA INFUSION & RECOVERY SUITE

# ProBath

Two commercial baths specified in Natural Thermowood for a calm, high-capacity cold-therapy area.

## WHY THIS MODEL

## Cold therapy built for repeat use

Automated filtration and water refresh reduce the manual work between sessions. The 2 HP cooling engine supports regular commercial use.

The engine can sit up to 10 metres from the bath, keeping heat and noise away from the guest area.

| 2 HP | 10 m | 316L |
|---|---|---|
| COOLING ENGINE | REMOTE PLACEMENT | MARINE-GRADE STEEL |

## HIKARI HOUSE FIT

Two baths allow paired or consecutive sessions and help keep the cold-therapy area moving at peak times.
